park, save costs
and create value.

easee®

Charge Pro

Your property is a valuable asset. The Easee Charge Pro is the professional charging solution designed to make it even more so.

Ideal for workplaces, apartment buildings, hotels, retail sites, and commercial car parks, it transforms charging from a simple amenity into a source of value. You will:

- Open up new revenue streams by monetizing charging sessions.
- Attract and retain high-value tenants and customers with an essential, in-demand amenity.
- Directly increase the capital value of your property, future-proofing it for a growing market.

The Easee advantage

The Easee Advantage is our promise of Effortless Electrification, delivered. It's a philosophy built on solving the core challenges every site owner faces from high upfront investment and grid limitations to the daily burdens of management.

This promise is backed by a proven platform of over 900,000 chargers that maintains >99% uptime. The Easee Charge Pro is the ultimate expression of this advantage for your business, combining our platform's reliability with the certified accuracy and advanced features your property demands, giving you ultimate peace of mind.

Manage your site, your way

Easee gives you total freedom over your site management. Use our free Easee Control portal for simple, cost-effective self-management, or for more advanced needs, choose from over 500 integrated Charge Point Operator service providers. Our open platform ensures you are never locked in, giving you the power to switch providers at any time for a better service or deal.

How we deliver

A free Easee Control portal and an open platform with over 500 service provider integrations.

This means for you

Gain total control over your operational model and costs, with the freedom to choose your ideal Charge Point Operator service provider.

Count on proven reliability and support

Designed and engineered in Norway for harsh conditions, the Easee Charge Pro runs on our proven charger platform - used by over 900,000 chargers in the field. This ecosystem delivers >99% charger uptime and enables our support team to resolve 97% of all issues remotely. It's all backed by a standard 5-year warranty, ensuring you're investing in a secure asset built for maximum uptime.

How we deliver

A proven charger platform with more than 99% uptime, dedicated support team and a standard 5-year product warranty.

This means for you

Exceptional operational uptime and the lowest possible total cost of ownership.

**Build trust with accurate,
compliant measuring**

A successful charging service is built on trust. To ensure every transaction is transparent and fair, you need precision you can count on. The Easee Charge Pro's built-in, MID-certified meter delivers legally compliant, accurate measuring. This ensures every invoice is trustworthy, your revenue is secure, and your users have complete confidence in the service you provide.

How we deliver

Built-in, class B ($\pm 1\%$) MID-certified energy meter.

This means for you

Confident revenue generation without the administrative workload.

**Scale as you grow, with minimal
upfront costs**

Eliminate the financial risk of guessing future EV demand. Your electrician installs our low-cost Easee Ready docking station at each parking bay to fully prepare your location. When a new charger is required, the Easee Plug & Play unit simply clicks into place. This ensures your investment scales directly with your revenue and is ready for whatever comes next.

How we deliver

The Easee Ready intelligent docking station and the Plug & Play unit.

This means for you

A faster return on investment with drastically reduced financial risk.

**Install more chargers on your
existing power**

Install more chargers without needing costly electrical upgrades. The Easee Charge Pro intelligently works with your location's existing power, distributing it to maximize the number of cars that can charge at once. This provides a larger charging facility for a fraction of the infrastructure cost.

How we deliver

Advanced Dynamic Load Balancing automatically distributes power across all chargers and the location.

This means for you

More charging capacity and revenue potential, without expensive grid upgrades.

Unlock your property's potential

Ready to turn your parking space into a reliable source of value? Our team can help you design a solution that meets your financial and operational goals. We have a dedicated network of certified installation partners ready to design and deliver the perfect solution for your property.
